OPENHOUSE

Finishing Days 2017 at Baumann Maschinenbau

27 to 29 June 2017 | Solms (near Wetzlar)

OUR EXHIBITS

BAUMANNWOHLENBERG LABEL-CUTTING SYSTEM

All companies that have to process large cutting volumes of paper- or IML-labels need a fail-safe high-quality cutting system. The Epsilon label system consists of a BSH pile hoist, an BSB L professional automatic jogger with scale counter, a BPS pressing station, a BFS gripper transport system and a WOHLBERG WB 132 high-speed cutter.

AUP PILE TURNER

Baumann BSW-AUP pile turners have been developed specifically for the needs of non-stop automatic sheet-fed printing and stamping machines. A major application area is industrial packaging. All operations take place automatically and are controlled by the program.

QUICKBINDER

Available in 3 editions: Basic, Universal, Digital

Easy to use with a major benefits:

- Fully motorised regulation of all important functions for setting block thickness and cover formats
- High-quality, high-performance spine preparation with main milling unit, multiple knife head and dust extraction system
- Comprehensive gluing technology for selective processing of hotmelt, coldglue and PUR gluing with separate processing of spine and side gluing
- Universal, easy-to-use rotary cover feeder for processing of 4, 6 and 8-page covers
- Gauzing station for production of Swiss and Otabind products in one run
- Easy of use thanks to Navigator, a graphically interactive user interface
- Option of a laydown device for a inline connection with a three-knife trimmer

HSB 9.000 SADDLE BINDER

The middle ground – operator friendly & economic.

The HSB 9.000 is the ideal solution if you are looking for a semi-automatic saddle binder for finishing folded sections in small and medium runs. Well designed and with a compact footprint, the HSB 9.000 is capable of handling a wide range of formats.

BOCRANA
BOCHSLER GRAFISCHE MASCHINEN

BSR 550 *basic* ROTARY DIE-CUTTER

Short set-up times, simple operation, economic and cost-efficient production.

The BSR 550 *basic* is suitable for the production of various products such as packaging, labels, mailings, presentation folders, etc. – from offset, as well as from digital printing.

K80 COMBI-FOLDER

The K80 combines quality and cutting-edge technology to give printers a powerful folding solution for 24/7 production. This Combi folder features high-quality precision components from MBO – including the option for a slitter shaft cassette – making it capable of a production speed of up to 230 m/min.

EUROPA DIGITAL LAMINATING SYSTEM

For optimum finishing quality in multi-shift operation:

- Perfect one-side laminating of both digital and lithographic printed products
- ideal for personalized prints and single series of print
- Comfortable operation due to the longer feeder table of 95 cm
- suction feeder for reliable processing
- pneumatic roller pressure of up to 1,1 t
- De-curling bar, which can be altered on the run
- Fully automatic feeding and separating of sheets
- Various options available (e. g. foiling etc.)

See all of these exhibits and more **live** during our **Open House** from 27 to 29 June 2017 in Solms.
